<b>MNF-W</b>	20051008	<b>FROM:</b>	072100COCT05	<b>TO:</b>	082100COCT05
<b>CG'S COMMENTS</b>					
<p>You should all mark this week prominently in your memory of service during OIF 04-06. Operations Iron Fist, River Gate, Mountaineer, and Continuous Thunder have successfully attacked and hurt the enemy at a time he desperately needed momentum. Your Marines and Soldiers have not only taken the kinetic fight aggressively to the enemy across the entire battlespace, but they have skillfully positioned the MNF-W to support the Referendum at the same time. What you do is extraordinarily difficult, clearly impressive, and vitally important. Remember your part in this week and be proud of yourselves and your units. It is an honor to serve with all of you.</p>					
<b>ENEMY SITUATION AND ASSESSMENT</b>					
<p>Reported incidents today were consistent with the daily average of 51 for this week. The majority of attacks continue to occur in MNF-W's decisive areas.</p>					
<b><u>AO DENVER</u></b>					
<p>Recent and ongoing MNF operations have placed AQI on the defensive. AQI's overt presence and intimidation campaign against locals has been reduced by MNF presence/targeting. Many cities along the Upper Euphrates River will begin to return to government control as MNF/ISF forces establish a sustained presence. In response to MNF pushing AQI out of large areas of Al Qaim and Hadithah, AQI'S propaganda arm has been actively masking their losses with daily statements to motivate their fleeing forces and convince an international audience of their continued strength. MNF operations will continue to disrupt AQI'S ability to coordinate and conduct attacks in the Upper Euphrates river valley. Insurgents will go where MNF is not at to avoid MNF targeting. Stand-off attacks remain the most likely threat to MNF in AO Denver with suicide operations mostly reserved for high payoff targets near major population centers.</p>					
<b><u>AO TOPEKA</u></b>					
<p>Reporting indicates that in Ramadi there will be a surge in Ramadan and election related insurgent attacks especially from 10-15 Oct. Attacks are expected to spike 96 hours prior to and during election day potentially as high as 20-40% higher than current levels – daily attack levels in Ramadi may reach as high as 31 attacks per day. The AQI attack surge will look similar to the attacks on 3 Oct, 15 Sept, and 23 Aug – direct fire, IED, S/VBIED and IDF complex attacks directed at MNF bases, OPs, ECPs and patrols.</p>					
<b><u>AO RALEIGH</u></b>					
<p>Extortion remains an important means of financing the insurgency especially since funding for many insurgent groups has been significantly reduced since Operation AL FAJR. Reporting suggests the existence of a small insurgent/criminal organization operating out of Karmah that is claiming to be Mujahadeen in order to frighten those targeted for extortion into paying money. In addition, kidnapping has been successful in the past and will most likely continue to be a lucrative means of raising capital for the insurgents.</p>					
<b><u>AO BILOXI</u></b>					
<p>The situation in Karbala and Najaf remains stable.</p>

Area reconnaissance for displace persons (DP) in AO:

Team leader conducted an aerial RECCE on both sides of Route Silver. Recce covered an area of about 25 km along Silver. Team leaders saw tents scattered about the area but not in any concentration.

- Comment: not uncommon for Iraqis to go out to the desert during Ramadan according to a Marine RAO (Middle East).

The aerial RECCE helps to eliminate uncertainty about areas that could hold internally displace persons (IDP).
